## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to compounds with a trifluoromethylphenyl urea and an oxy phenyl core with a thiodiazol, or a benzothiadiazole, benzofuran, dioxin, dioxol, benzimidazole, benzothiazol, indolyl, imidazo pyridine, imidazoquinoline or a trifluoromethylphenyl urea and an sulfanyl phenyl with a pyridyl group.

Group II, claim(s) 33-11, 21-27 drawn to methods of treating diseases with inhibition, regulations or modulation of tyrosine kinase or Raf kinase signal transduction, wherein the disorders are solid tumors or angiogenesis.

Group III, claim(s) 12,13, and 6 in part drawn to a method of treating an ocular disorder.

Group IV, claim(s) 6, 13-14 in part drawn to treating inflammatory disorders.

Group V, claim(s) 15 and 6 in part, drawn to treating bone pathologies.

Group VI, claim(s) 16, drawn to complex compositions.

Group VII, claim(s) 18-20, drawn to a process of making a medicament.

Group VIII, claim(s) 17, drawn to a kit.

Applicants claims are written as use claims and the examiner has interpreted them as method of treating/ inhibiting.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

See compounds as given in WO 00/42012 pages 53, 54 which discloses the phenyl oxy pyridyl groups. And phenoxy indole group. Also see the table compounds 69. In view of the generic claims and the species disclosed the applicant's core is not considered to be a contribution over the prior art and hence there is a lack of unity.

An attempt was made to reach Mr Zelano, however the examiner was unable to do so and hence did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected

process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
